### 4. First aid measures

<b>Inhalation:</b>	Move exposed person to fresh air and provide oxygen. Get medical attention if coughing or respiratory discomfort occurs.
<b>Skin:</b>	As a precaution, remove clothing and shoes if contaminated. Avoid prolonged or repeated contact with skin. Wash with soap and water to remove the material from skin. Get medical attention.
<b>Eye:</b>	Wash eyes with water for 15 minutes. If irritation occurs, get medical attention.
<b>Ingestion:</b>	If large quantities of this material are swallowed, call a physician immediately. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person.
<b>Notes to physician:</b>	Treat symptomatically.

### 5. Fire-fighting measures

<b>Suitable extinguishing media:</b>	Products contain large amounts of water, so there is no limit to the types of fire extinguishing medium, the choice of its surrounding area environment should be considered. Spray, Carbon dioxide, foam, dry chemical and water fog.
<b>Extinguishing media which must not be used for safety reasons:</b>	Not available
<b>Specific hazards arising from the chemical:</b>	Incombustible, fire could cause the release of harmful vapors. When fire may produce carbon monoxide, nitrogen dioxide, nitrogen oxide and other organic matter such as cracking of typical combustible components.
<b>Fire Fighting:</b>	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
<b>HAZCHEM code</b>	None.

### 6. Accidental release measures

<b>Personal precautions:</b>	Cut off the source of fire, immediately contact the workers, and keep other person stay in safe areas. As much as possible cut off the source of leakage, prevent it access to sewers, drains, water. Comply with relevant fire procedures, and refer to chapter 8 of the safety data sheet.
<b>Containment procedures:</b>	Do not let product enter drains.
<b>Methods for cleaning up:</b>	FOR LARGE SPILLS: Remove with vacuum truck or pump to storage/salvage vessels. FOR SMALL SPILLS: Soak up residue with an absorbent such as clay, sand or other suitable material. Place in non-leaking container and seal tightly for proper disposal.

### 7. Handling and storage

**Precautions for safe handling:** Avoid long or repeated contact with skin, thoroughly clean after contact. Prevent damage of packaging and container, loading and unloading lightly when moving, Operators must receive special training; strictly abide by the operation procedures. To avoid oxidizing reaction. Avoid contact with the strong acid, hydrochloric acid, acid anhydride and chloroformate. Equipped with corresponding quantity of fire equipment and emergency handling equipment. When loading and unloading of 200 liters of bottled products, should wear protective shoes. Empty containers may remain inside.

**Storage:** Keep container sealed, do not store in open or unlabeled containers. Store in a cool, dry place with adequate ventilation, keep away from strong oxidizer, sunlight, heat and combustible. Storage temperature is -5°C ~25°C. Store in original container.

## 8. Exposure controls/personal protection

**Control parameters** Follow standard monitoring procedures.

**Occupational exposure limits** No exposure limits noted for ingredient(s).

**Biological limit values:** No biological exposure limits noted for the ingredient(s).

**Exposure guidelines** No exposure standards allocated.

**Appropriate engineering controls:** Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

**Personal protective equipment:**

**Eye/face protection:** If may splash, use safety goggles please.

**Skin protection:** Under the condition of normal use, in addition to ordinary work clothes, do not need special skin and body protection equipment. In case of splash, according to the actual situation of the workplace to choose suitable, non-permeable safety clothing and safety shoes, recommended material is NBR.

**Respiratory protection:** Don't need to wear respiratory protective equipment under the condition of normal use. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, need to choose to conform to the requirements of the relevant laws and regulations of respiratory protection equipment. Specific content consult the supplier of respiratory protection equipment.

**Hand protection:** Using the resistance to chemical corrosion protective gloves, such as the use of PVC material gloves. Contaminated gloves timely replacement. Thoroughly clean with soap and water after operation.
